

QUALITY POLICY

The most important potentials of our organization are the reliability in the engagement of our service network, its competence and individual care for our customers.

This is based on the implementation of our mission statement which relays on our co-operation within the Service Network of the EUROMOVERS organisation, which is based on reliability, high levels of service and the trustful execution of the requirements of our Clients.

As of such, we realize and measure our Quality and our Quality Objectives within the range of our services, which we define during our annual management reviews and periodic, as well as established annual internal audits.

These tools are used to evaluate our services by customer satisfaction and to provide a continuous improvement of our quality and that of our Service Network.

It is our major quality objective to provide the required quality standards ruled within the industry and try to improve them.

Management and Employees of EUROMOVERS International S.A. are obliged to fulfil this Quality Policy within the range of each person's area of responsibility.
